

JWPCP Powers Up Even More **GREEN** Power

Celebrate Green, Wear Green on 3/17!

6pm • Thur. Mar. 17th

Senior Engineer **Tom Fang** of Los Angeles County Sanitation Districts will explain the design and construction of upgrades to the Combined Cycle Power Plant at the agency's Joint Water Pollution Control Plant (JWPCP) in Carson. The Power Generation Facility Steam Cycle Modifications project increases production capacity to 36 MW.

The Project includes replacement of major equipment and a state-of-the-art Distributed Control System. Startup of the steam cycle portion of the CCPP is anticipated later this year.

Once completed, JWPCP will be capable of operating independent of the local power grid and exporting surplus power, thus furthering the Districts' commitment to protecting public health and the environment.

Please pay at the door: \$35 CWEA members / \$40 Non-members / \$20 Students or retirees

Dinner:

1. Roasted Prime Rib
 2. Baked Atlantic Salmon with Light Teriyaki Glaze
 3. Pasta Primavera
- Carrot cake dessert
