

Operating a Water Recycling Plant

NOW AND IN THE FUTURE

11 am to 1 pm Thursday, Sept. 15th

Long Beach Water Department Senior Operator **Richard Salas** will present several high-tech pilot projects LBWD is working on to improve operations and then lead us on a tour of the Leo J. Vander Lans water treatment facility. The facility takes 3MGD of tertiary treated wastewater from LACSD's Long Beach treatment plant and purifies it through microfiltration, reverse osmosis and UV disinfection. The clean water is then injected into a seawater intrusion barrier to protect local groundwater. Lunch on-site.

Please no open toed shoes or high heels / Limit 30 people / RSVP Today!

Pay at the door: \$18 CWEA members / \$25 Non-members / \$10 students or retirees. 1 CWEA contact hour available.

Please note: There is a median on Willow. It is best to exit the 405 at Palo Verde Ave, go north to Willow, turn right and go 1 mile.

Lunch:

Passion Fruit Catering
Sandwiches, salads, sodas and cookies.
