6-8:30pm

# CWEA LABS

The California Water Environment Association is a California nonprofit public benefit corporation. CWEA is dedicated to the educational development of its members, who are wastewater professionals. CWEA conducts training, disseminates information, produces training manuals, and tests for competency. The Los Angeles Basin Section (LABS) of the California Water Environment Association (CWEA) is a local chapter composed of professionals involved in the wastewater industry. Our members are public and private wastewater treatment operations, maintenance, safety, planning, public affairs, collections systems folks, consulting engineers, equipment manufacturers, as well as retired professionals and more.

## CWEA LABS

### Student & Young Professional (S&YP)

The Student & Young Professional Committee (S&YP) goals are to introduce younger wastewater professionals and students to CWEA, and provide a place to learn more about careers in the wastewater, water resources, and environmental fields. A Young Professional is any member or prospective member that considers themselves to be relatively new in the wastewater industry. They can be of younger age, or have less years of experience, or simply ***be young at heart***. Many of today's young professionals include students, project engineers, plant operators, maintenance personnel, technical specialists

California Water Environment Association  
Protecting our water environment through education and training

# What To Expect In 2012?

- Join us to visit more water wastewater storm water treatment plants. Wish list includes but not limited to
  - Hyperion Treatment Plant
