

Save the date and attend this unique training opportunity!

CHARLES P. CROWLEY COMPANY'S PUMP / FEED / MIX ACADEMY

Tuesday, May 9, 2017 OR Wednesday, May 10, 2017

CPC Co. is pleased to announce the return of our popular Pump / Feed / Mix Academy. This one-day workshop will be conducted on two consecutive days (identical program offered each day) for your staff's convenience.

This year's classes include: Various Pumping Technologies, Chemical Feed System Basic Design, Pump Controls and Instrumentation, Mixing Options, and more. Our very popular Pump Laboratory demonstrates the tear down of pumps. The one-day workshops are offered at SCE's beautiful Energy Education Center, which is located one mile north of our office in Irwindale, CA.

Please consider attending this fun and unique training opportunity for:

- ◇ Pump / Feed / Mix design, operational tips and troubleshooting advice for consulting engineers, contractors, and facility owners & operators – both in the industrial and municipal markets
- ◇ “Hands-on” equipment training provided by our service technicians
- ◇ Factory literature to assist in your future projects and the opportunity to speak with several equipment manufacturers
- ◇ Approved continuing education certificate for 6.0 CDPH contact hours
- ◇ A tasty lunch
- ◇ And the opportunity to learn and share good fellowship with CPC Co.'s friends and staff

Email charlieschatter@cpcrowley.com for **registration information**. Availability is very limited, so please respond promptly.

All of us here at CPC Co. look forward to seeing you here in Irwindale - in person – in May! And, as always, thanks for your business!

2017 Pump / Feed / Mix Academy

This event provides:

- ✓ A thorough review of design and operation fundamentals for pumping, chemical feed, and mixing processes
- ✓ “Hands-on” equipment training for pump tear down, including recommended maintenance procedures
- ✓ An opportunity to speak with several equipment manufacturers
- ✓ A delicious catered lunch
- ✓ Approved continuing education certificate for 6.0 SWRCB contact hours
- ✓ All included for the bargain price of \$75 per attendee (\$100 after 4/17/17.)

When: 8:00 am to 3:30 pm on **May 9th / 10th, 2017** (This is a one-day workshop; the identical program is offered each day.)

Where: Just up the street from our location, the class will be held at the SCE’s Energy Education Center, 6090 North Irwindale Ave, Irwindale, CA 91702.

What: Both of the identical daily workshops will feature classroom training for operation of pumping, chemical feed, and mixing processes, in addition to “hands-on” training. This is an ideal opportunity to share your process knowledge with other industrial and municipal engineers, contractors, and O&M personnel.

How: Please register by returning the portion below by fax 626-856-5658 or email charlieschatter@cpcrowley.com no later than 4/17/17. **Availability is very limited, so please respond promptly!**
