

The Los Angeles Basin Section of CWEA Dinner Meeting and Presentation September 28, 2017

Advances in Digestion

Please join LABS to learn about Anaergia's Omnivore digestion system complete with high solids mixers. These robust digesters have higher throughput and produce more digester gas while maintaining a small footprint. Digesters that used to treat a single feedstock can be retrofitted for more than one feedstock (co-digestion). Mr. Scherson will also discuss an Anaergia food waste digestion facility in Rialto, California.

When: Thursday September 28, 2017
6:00 pm Social Hour
7:00 pm Dinner
7:30 pm Presentation
