Hyperion Treatment Plant Tour: Digesters, Digester Gas Utilization Project and High Speed Centrifuges

Recently, the Hyperion Digester Gas Utilization Project (DGUP) was completed, providing Hyperion Treatment plant with a cogeneration facility that will satisfy the heating and electrical power requirements for the facility. Following a brief presentation by Hyperion's Operations Manager Hi Sang Kim, LABS will tour the new DGUP facility, high-speed centrifuges and egg-shaped digesters. Following the tour, join us for dinner in Hyperion's Environmental Learning Center. Tour limited to 40. On-line RSVPs required.

This event has been approved by C W E A for 1 contact hour (0.1 C W E A TCP Continuing Education Credits)

When: Thursday June 28, 2018
