

# The Los Angeles Basin Section of C W E A LA Sanitation - One Water Climate Risk Assessment for Wastewater and Stormwater Infrastructure

## Dinner Meeting and Presentation December 13, 2018

Please join LABS and learn of the in-depth approach the City of Los Angeles has taken to address the risk of climate change with respect to wastewater and stormwater infrastructure. This presentation will cover how LASAN identified potential climate risks with future climate change considerations, discuss how the climate risk assessments on was performed, discuss engineering site-specific resilience improvements, and cover the recommendations to ongoing designs for improving climate resiliency.
