

**The Los Angeles Basin Section of CWEA
Water Replenishment District
of Southern California
Groundwater Reliability Improvement Project
and Support Building
Dinner Meeting and Presentation
February 28, 2019**

Please join LABS to learn about the Water Replenishment District of Southern California (WRD) programs to increase water recycling and groundwater reliability. WRD is currently constructing the Albert Robles Center for Water Recycling & Environmental Learning (formerly known as the Groundwater Reliability Improvement Project (GRIP)). Once complete the facility will purify approximately 10,000 acre feet (3.25 billion gallons) of tertiary treated (recycled) water annually to near-distilled levels through an advanced water treatment facility. Together, with another 11,000 acre feet (3.6 billion gallons) of recycled water, WRD will deliver 21,000 acre feet of water to the San Gabriel Coastal Spreading Grounds where it will percolate into the Central Basin.

When: Thursday February 28, 2019

Where: Acapulco Restaurant

6:00 pm Social Hour

9021 E Firestone Blvd

7:00 pm Dinner

Downey, CA, 90241

7:30 pm Presentation
